

Strategic Partnership for Creativity and Entrepreneurship – newsletter

Introduction

Project “Strategic Partnership for Creativity and Entrepreneurship (acronym SP4CE)” has been funded with support from the European Commission under the ERASMUS+ Programme. Project started on 1 September 2015 and will end on 31 August 2017.

Result of the project will be designed and developed by the partners innovative common tools for collaboration between students, enterprises and schools (teachers). Those tools will be available as ICT solution with WWW interface designed for use in three main target groups:

- Coaches (enterprises, industry)
- Mentors (vocational school, university, high school)
- Students (vocational school, university, high school)

Project activities will concentrate on developing relations between students and enterprises for identification of students’ and enterprises’ needs and supporting their collaboration through mentoring and consulting activities.

Project background

Bruges Communiqué identified problems with lack of trainings increasing competence of students in areas needed by enterprises and lack of innovative solutions for student-teacher-enterprises collaboration in vocational and high education trainings.

Project addresses directly aims and needs identified in Bruges Communiqué on enhanced European cooperation in vocational education and training, especially in the areas of:

- improving the quality and efficiency of vet and enhancing its attractiveness and relevance,
- enhancing creativity, innovation and entrepreneurship.

Planned project outcomes and results

Project results and actions which will be targeted for students, coaches from enterprises and mentors from high schools and universities will be connected with:

- promoting innovative practices in education,
- training by supporting personalised learning approaches,
- collaborative learning and critical thinking,
- strategic use of Information and Communication Technologies (ICT),
- promoting and using Open Educational Resources (OER),
- open and flexible learning,
- virtual mobility,
- other innovative learning methods.

Developed during the project SP4CE portal will provide the space for:

- problems to be solved, questions to be answered,
- creation of the teams which want to work towards the problem solution,
- work for teams or individuals to develop the solution,
- mentoring & coaching,
- presentation of developed solutions,
- publishing of the chosen solution.

Kick-off-Meeting

The project started on 1 September 2014. The first meeting of the project participants was held in Kosice, November 14, 2014. During the kickoff meeting project aims and objectives were discussed as well as a detailed plan for realization of project was elaborated.

Creativity and entrepreneurship support training in Kosice

On 12-16 January 2015 members of the consortium implementing the project Sp4ce participated in the training organized by the Slovak partners. During the training partners were familiarized with the results of previous initiatives carried out by the Slovak partners in the field of entrepreneurship and creativity and also participated in a series of meetings and trainings to familiarize them with the different approaches encountered in this topic.

First working meeting

First working meeting will take place on 17 April 2015 in Budapest. During the meeting partners will summarize the first period of the project and prepare plans for the next period.

SP4CE

Collaboration with enterprises and utilization of COACH project results training in Budapest

On 4-8 May 2015 SP4CE consortium partners will take part in training organized by TREBAG in Budapest. The main topic of the training will be means of collaboration with enterprises and utilization of Coach project. Five days training activities will have formats of study visits, presentations and discussion workshops.

Dissemination activities

An article presenting information about SP4CE project prepared as a joint initiative of consortium partners will be presented during the e-Technologies in Engineering Education conference which will take place in Gdansk on 30 April 2015.

The goal of the conference is to popularize the latest technologies and good practice in engineering education, as well as show how to integrate e-learning technologies in order to enhance both the teaching and learning experience.
